TwinLine ^{new}

MHZ VENETIAN BLINDS

TwinLine ^{new}

Even more convenient, even more aesthetic

Experience the new generation of the freely movable MHZTwinLine Venetian blind. An innovative operating concept now makes it possible to tilt the slats both from above and below. For even more quality living in your home!

The core element is the high-quality rotary handle in purist design. It combines perfect ease of use with exclusive aesthetics and together with the rail forms an harmonious entity.

Intuitive operation

The handy rotary handle on the top and bottom rail is the blind's central control element. Position the blind anywhere and modulate the incoming light very easily using the integrated seamless rotary function.

Particularly practical: with the extra rotary element on the bottom rail, blinds on high and hard to reach windows can now also be easily operated.

The original. Now even better.

The benefits to you at a glance

- Perfect privacy, glare and sun protection
- Flexibility thanks to free movement in both directions
- Novel operating concept for even easier use
- Uniform aesthetics of rotary handle and rail
- Practical and intuitive: rotary handle for bespoke positioning and adjustment of the slats
- Easy access from below
- Different installation variants - Can even be fixed without drilling or screws
